**The Chillicothe Telephone Company**

**ACCESS LINE  
SERVICE**

**General  
Description**

Local access line service is a telephone line that extends from the telephone company's central office to the customer's premises. The line gives the customer access to the public switch telephone network and associated features.

**Business Rates**

Single Party Access Lines\* – 4 or more, each .....  
\$39.80

Trunk Lines .....  
\$80.00

Key System Trunk Lines .....  
\$60.00

Service Connection Charges apply as found elsewhere in this catalog.

\* Rates, terms, and conditions for 1 – 3 Single Party Access Lines can be found in the Company's tariff.

**The Chillicothe Telephone Company**

**BASE RATE  
SERVICE**

**A. Description**

Horizon Base Rate Service provides for the simultaneous two-way transmission of synchronous digital signals at speeds of 2.4, 4.8, 9.6, 19.2, 56, or 64 Kbps. The service is available in either two-point or multi-point configurations, except for 64 Kbps service which is available only in a two-point configuration. The service is available between:

- Customer-designated premises.
- Customer-designated or Other Telecommunications Carriers (OTC) premises to the premises of an OTC for connection to the services or facilities of the OTC.
- Company wire centers for interconnecting Horizon Base Rate Services, Horizon 128, 256 and 384 Services and Horizon DS1 Service via channel mileage and channel mileage terminations.
- Company wire centers for interconnection central office multiplexers.
- Customer-designated premise and a Company wire center where multiplexing, bridging, hubbing, or cross-connection functions are performed.

Multi-point bridging is an optional broadcast polling arrangement which consists of a single master station and two or more remote stations. Transmissions from the master station are received by all remote stations. Transmissions from the remote stations are received only by the master station.

For the optional secondary channel feature, the following transmission speeds as they relate to Horizon Base Rate Service apply:

Horizon Base Rate Service Secondary Channel

2.4 Kbps 133.0 Bps 4.8 Kbps 266.0 Bps 9.6 Kbps  
533.0 Bps 19.2 Kbps 1.066 Kbps 56.0 Kbps 2.66  
Kbps

## BASE RATE SERVICE

### B. Definitions

**Multi-point Bridging** This capability provides communications between three or more Horizon Base Rate Service locations.

**Secondary Channel** Secondary channel provides a companion channel over the same facility used to provide the primary channel, but at a lower bit rate.

### C. Terms and Conditions

1. Multi-point bridging for Horizon Base Rate Services at speeds of 2.4, 4.8, 9.6, 19.2 and 56 Kbps are only available from appropriately equipped wire centers. Customers must choose their bridging locations from those equipped offices. A service inquiry must be made to determine availability of service.
2. Multi-point bridging is not available for Horizon Base Rate Service at 64 Kbps.
3. For multi-point bridging, the mileage to be used in determining the monthly rate for the channel mileage is calculated on the airline distance between the serving wire center of each customer designated premises and a wire center bridging location, plus the airline distance between multiple bridging locations, where applicable. When a multi-point service is connected to a central office multiplexer, the mileage calculation will also include the airline distance between a bridging location and a central office multiplexer location.
4. Horizon Base Rate Service is provided at the option of the Company where facilities permit. If appropriate facilities are not available, *Special Construction* charges may apply.
5. For optional Secondary Channel:
  - Secondary channel is not available with 64 Kbps service.
  - While the primary and secondary channels operate independent of each other, they must co-terminate in common customer equipment.
  - When a multi-point circuit is provisioned to utilize secondary channel, all stations on the multi-point circuit must be equipped with secondary channel capability.

- The secondary and primary channels operate independently of each other, over the same facilities, and must be co-terminated in customer common equipment.

**BASE RATE  
SERVICE**

**D. Optional Features**

**Central Office Multiplexing and Cross Connect Services**

These optional services are available with Horizon Base Rate Service. Refer to Central Office Multiplexing and Cross Connect Services in Section 8 of this tariff.

**Error  
Correction**

This feature is available in conjunction with a Horizon Base Rate Service channel operating at a speed of 2.4, 4.8, 9.6 or 19.2 Kbps. It is available in either point-to-point or multi-point configurations, except for 19.2 Kbps service which is available only in a point-to-point configuration.

**Multi-Point Bridging**

Provides for communications capability between three or more Horizon Base Rate Service locations.

**Secondary Channel**

This feature is available in conjunction with a Horizon Base Rate channel operating at a speed of 2.4, 4.8, 9.6, 19.2 or 56 Kbps (considered the primary channel) and provides a companion channel over the same facility used to provide the primary channel, but at a lower speed.

**BASE RATE  
SERVICE**

**F. Pricing (cont.)**

**3. Payment Plans**

**• Month-to-Month**

Horizon Base Rate Service is available on a month-to-month basis.

**• Term Payment Plans**

Horizon Base Rate Service is available under the Term Payment Plan (TPP) whereby customers may elect to pay a fixed rate for a 12, 36 or 60 month period. After the minimum period is satisfied, the monthly rate will apply unless a new TPP is selected.

**4. Termination Charges**

Termination Charges will apply to service terminated prior to the contracted period. The termination charge for all TPP terms for Horizon Base Rate Service will be 50% of the remaining monthly obligation for the term selected.

P.U.C.O. approval of the above termination liability language is not intended to indicate that the P.U.C.O. has sanctioned any particular legal result should a dispute arise between the parties. In the event of a dispute, signatories to such contracts may pursue whatever legal remedies they deem appropriate to resolve the dispute.

**The Chillicothe Telephone Company**

**BUNDLED SERVICE  
PACKAGES**

**HORIZON BUILD YOUR OWN BUNDLE BUSINESS PACKAGES**

**A. DESCRIPTION**

The "Build your own" packages will allow small business customers with only one party business lines to choose a combination of regulated and non-regulated services that best suits their individual needs while still obtaining a bundle discount. This offers a multi- service discount of 5.00 for each major service. Maximum discount any customer can receive is 25.00.

**B. TERMS AND CONDITIONS**

This package is available to businesses with only one party business lines, with up to five lines available.

Qualifying services must be billed on one account for use at the exact same service address.

Customers must specify which features they want at the time they place their order. Additional features may be purchased at regular rates. In the event that customer wishes to order additional class or customer calling features, the multi-feature discount may still apply. Other calling features cannot be substituted for those listed as included in the bundle.

Additional bundle upgrades may be available.

All applicable non-recurring charges will apply unless otherwise waived through a promotional offering.

If a customer fails to submit timely payment sufficient to cover the entire amount of the regulated and unregulated bundled package rate, the Company will disconnect service in accordance with the PUCO Minimum Telephone Service Standards.

Horizon Build Your Own Bundle Packages are only available to single-line business customers where services and facilities exist.

Customers must agree to the term of a 36 month signed commitment.

- The package can only be purchased in conjunction with certain non-regulated and/or detariffed services

**The Chillicothe Telephone Company**

**CENTREX SERVICE**

**A. General**

1. Centrex is a central office based business communications service which provides capabilities similar to those offered on a Private Branch Exchange, but without requiring switching equipment on the customer's premises. Centrex integrates all of a business customer's lines into a single telecommunications system.
2. All Centrex station lines will be equipped with the standard features as set forth in paragraph C.1. Additional optional features may also be selected and generally result in additional charges as specified in paragraph C.2, C.3 and C.4.

**C. Feature Package and Pricing**

1. Centrex Basic Feature Value Package (Cont.)

e. Simulated Facility Group (SFG) Charge

A charge applied to Centrex service users for the provision of central office trunking to the Centrex access lines. SFGs are sometimes referred to as Virtual Facility Groups (VFGs) or Network Access Registers (NARs). SFGs restrict the number of simultaneous calls between a Centrex group and the public network. For example, a 100-line Centrex group could be limited to 14 simultaneous calls to/from the public network if 14 simulated facilities are used. This emulates the physical connections (trunks) that would be used between a PBX and Central Office. The following table is used to apply SFGs using average traffic estimates. Subscribers may choose fewer or additional SFGs to meet calling requirements based on no cost traffic studies provided by Chillicothe Telephone on a per request basis with a maximum of four per year at no charge.

**Pricing: \$ 35.00 per SFG (per number of access lines as figured below)**

#### 4. Centrex Package Options

Message Detail Recording – Incoming Calls  
Message Detail Recording – Outgoing Calls  
Auto Call Back  
Inside Centrex Group Only  
Forced Customer Dialed Account Record  
Non-forced Customer Dialed Account Record  
Call Accounting Monthly Detail Record  
Voice Message Waiting – Stutter Dial Tone or Visual Indicator  
Music-on-hold Interface  
Voice Paging Interface

**Pricing: Each item in C. 4. a. – i. is \$ .50 per line per month**

#### 5. FCC Access Charge

The FCC Customer Access Line Charge (CALC) will be assessed based upon the total number of Centrex lines to which the customer subscribes. This amount will be collected by the Telephone Company and forwarded to the National Exchange Carrier Association. However, the Telephone Company will credit the customer for the CALC times the total number of Centrex lines minus the number of Simulated Facilities (including OutWATS Simulated Facilities) to which the customer subscribes. The customer's net CALC assessment will therefore be based upon the number of simulated facilities used.

### **D. Regulations and Conditions**

1. The minimum charge period for services provided under this tariff shall be for one month.
2. Centrex is offered subject to the availability of outside plant and/or central office facilities.
3. One directory listing is provided without charge for each Centrex customer.
4. The customer may choose to pay for the services on a month-to-month basis or under a service contract plan. A month-to-month customer may, at any time, convert to a service contract plan by paying the applicable service period plan rate currently in effect.
5. Each Centrex line may be arranged for two-way, one-way incoming or one-way outgoing operation depending upon the option chosen by the customer at the time is installed. When a change in the operation is requested by the customer, the appropriate service charges as specified in this tariff apply per line affected.

**Catalog of Toll and Local Business  
Effective: April 2, 2008**

Page 17

**The Chillicothe Telephone Company**

**CENTREX SERVICE**

**D. Regulations and Conditions**

6. Subsequent line additions/deletion to the original service contract period are stipulated as follows:  
:
  - a. Subsequent additions will be rated under a new contract or added to an existing contract, based upon the remaining period of the initial contract. If the line addition causes the customer's total Centrex line count to exceed the threshold of the line count previously contracted, all lines will be billed at the rate for the larger line count.
  - b. Subsequent line deletions, resulting in reductions causing the total number of lines to fall into a different line size group, all remaining lines will be billed at rates for the smaller line size group.
7. If service is canceled by the customer after installation of the service, but prior to the completion of the service period, the customer shall be obligated to pay a termination liability charge. The charge is calculated by multiplying the monthly rate by the remaining months in the contract period times fifty percent. This penalty applies only to customers abandoning Centrex service altogether. A customer who reduces the quantity of Centrex lines under contract will not be liable for termination liability charges for the duration of the contract period.
8. Reduction/waiver of service establishment charges may be offered as follows:  
  
At the Telephone Company's discretion, nonrecurring service initiation and/or programming charges may be reduced or waived during promotional campaigns and/or as a part of customer negotiations.
9. When used with Call Forwarding or Call Transfer, the Centrex customer is responsible for

the payment of the applicable toll charge for each billable call connected over the public network between the Centrex station and the station at which the call is answered. The charge is applicable to each call answered, including the Call Forwarding set-up call. It also applies to collect and person-to-person calls, which may be refused at the answering station,

10. Centrex service does not include terminal equipment on the customer's premises. Terminal equipment may be provided by the customer.
11. Touch-tone dialing is a standard feature for Centrex service.
12. Unless specifically exempted, Centrex service shall be subject to all general regulations applicable to the provision of service by the Telephone Company as stated in this catalog.

**Catalog of Toll and Local Business  
Effective: April 2, 2008**

Page 18

**The Chillicothe Telephone Company**

**CENTREX SERVICE**

**E. Definitions**

8. Call Forwarding Variable – All Calls

Call Forwarding Variable enables a station user to divert all incoming calls to another directory number. Activation, deactivation and the forward-to destination are controlled by the station user.

9. Call Hold

Call Hold allows a station user to place a call on hold in order to initiate a second call, answer a waiting call, consult privately with another party, or return to the previously held call.

10. Call Pick-Up

Call Pick-Up permits a station user to answer incoming calls directed to another station within the same pick-up group by dialing an access code.

11. Call Transfer

Call Transfer allows a station user to transfer calls to another station by flashing the switch hook and dialing the transfer-to number.

12. Call Waiting

Call Waiting provides a burst of tone to inform a station user with a call already in progress that another call is waiting to be answered. The station user may answer the waiting call by hanging up or flashing the switch hook.

13. Cancel Call Waiting

Cancel Call Waiting allows a station user, on a per-call basis, to deactivate Call Waiting by dialing an access code.

14. Circle Hunting

Circle Hunting allows calls directed to busy stations in the middle of the hunt group to search through to the end of the hunt group and then return to the beginning of the hunt list in search of an idle station. The caller is connected to the first idle station encountered.

**Catalog of Toll and Local Business  
Effective: April 2, 2008**

**CENTREX SERVICE**

**E. Definitions**

#### 15. Code Restriction

Code Restriction blocks the completion of calls that are directed to customer specific area codes (NPAs) and/or central office codes (NXXs). A Code Restriction list may be assigned to either an individual line or shared by multiple lines.

#### 16. Customer Dialed Account Record – Forced/Non-Forced

Account Codes for Customer Dialed Account Recording assist in making client billing of phone charges hassle free. The Account Code features allow the customer to add an account code to a Message Detail Recording (MDR) record. An account code can be optional or required, and is entered either before or after dialing the Private Facility, Public Network, or Automatic Flexible Routing access code depending on the Account-Code-Access-Code (ACAC) being used.

#### 17. Delay Announcements for Queued Calls

Delay Announcements can optionally be used to inform a caller that his or her call has been placed in a queue. The delay announcement can be repeated at regular intervals until an idle station becomes available.

#### 18. Direct Access to Private Facilities

Direct Access to Private Facilities allows Centrex subscribers to dial a code to gain access to lower cost private facilities.

#### 19. Direct Connect Service – Hot Line

Direct Connect Service allows a station user to automatically place a call to a pre-selected directory number by lifting the receiver off the switch hook. No dialing is required for the calling party to reach the specified destination.

#### 20. Direct Connect Service – Warm Line

Warm Line provides a time-out option. The time-out interval may be set a 1 to 14 seconds. During the time-out interval, a station user will receive normal dial tone and can originate calls. However, after the time-out interval expires, a call is automatically set up and routed to the specified destination.

#### 21. Direct Inward Dialing

Direct Inward Dialing allows Centrex station users to directly receive incoming calls without the assistance of an attendant.

## **CENTREX SERVICE**

### **E. Definitions**

**22. Direct Outward Dialing**

Direct Outward Dialing enables Centrex station users to call outside the Centrex group directly without the assistance of an attendant.

**23. Direct Station Selection**

Direct Station Selection is an optional Attendant Console feature that permits the attendant operator to push a single key to extend a call to a station.

**24. Directed Call Pick-Up**

Directed Call Pick-Up enables a station user to answer a call that is ringing at another station within the Centrex group by dialing an access code and the ringing station number.

**25. Distinctive Ringing/Call Waiting Tones**

Distinctive Ringing/Call Waiting Tones allow a Centrex station user to determine the source of incoming calls (from within or outside the business) by the Distinctive Ringing pattern or the Call Waiting tone. Normal ringing and Call Waiting Tones are used to identify intra-Centrex group calls. Call which originate from outside the Centrex group are identified by either two short rings and/or Call Waiting tones.

**26. Do Not Disturb**

Do Not Disturb allows a station user to prevent incoming calls from ringing at his/her station by diverting them to a tone or recorded announcement. This feature can be offered with a Personal Identification Number (PIN) override option that selected callers

can dial to override Do Not Disturb.

#### 27. Fully-Restricted Line

A Fully-Restricted Line is prevented from making calls to and/or receiving calls from stations outside the Centrex group. It is also prevented from making calls to and/or receiving calls from the attendant, thereby denying it indirect access to/from outside the Centrex group.

#### 28. Intercom Dialing

Intercom Dialing allows Centrex station users to call other stations within their Centrex groups by dialing abbreviated codes.

### **Catalog of Toll and Local Business Effective: April 2, 2008**

Page 21

**The Chillicothe Telephone Company**

## **CENTREX SERVICE**

### **E. Definitions**

#### 29. Message Detail Recording

Message Detail Recording (MDR) provides a customer with the capability to receive detailed information about certain types of calls.

#### 30. Music on Hold Interface

The Music on Hold feature provides music or an announcement for calls that are put on hold. The music source can be provided by the customer or the Operating Company with the connection made via a Centrex trunk. The music is administered as a Centrex intercept and the capability of defining a certain sequence of announcements and music is provided.

#### 31. Night Service

Night Service allows calls directed to the attendant to be re-routed to pre-designated station lines within the same Centrex group when the attendant position is not staffed (i.e., evening hours, weekends).

### 32. Off-Premises Stations

Off-Premises Stations enables a secondary business location to access the same Centrex features and services as the main business location. The secondary locations must be served by the same Digital Central Office as the primary location.

### 33. OutWATS

OutWATS is a form of Direct Distance Dialing service that allows a station user to place long distance calls to specified geographical areas at reduced rates. Each OutWATS call is screened to ensure that the call destination is within the band limits of the OutWATS station user.

### 34. Preferential Hunting

Preferential Hunting allows any station in a Multi-line Hunt Group to have its own (preferential) hunting list. If a call is made to a station with a Preferential Hunting list assigned to it, and that station is busy, the preferential list is first hunted until an idle station is found. If an idle station is not found on the preferential list, the hunt will proceed to the entire hunt group.

**Catalog of Toll and Local Business  
Effective: April 2, 2008**

Page 22

**The Chillicothe Telephone Company**

## **CENTREX SERVICE**

### **E. Definitions**

#### 35. Queueing

Queueing may optionally be used when all stations in a hunt group are busy. When this occurs, a call is placed into a queue. The call remains in the queue until an idle station is located. Up to ten calls can be in queue for a Multi-line Hunt Group. Queueing cannot be provided for Preferential Hunt groups.

#### 36. Regular Hunting

Regular Hunting or Linear Hunting is performed in a sequential fashion across all members of a Multi-line Hunt Group. The search for an idle station starts with the pilot number. If the first station is busy, the group is sequentially hunted until an idle station is found. If there are no idle stations available, the caller receives a busy signal.

#### 37. Semi-Restricted Line

A Semi-Restricted Line is prevented from making calls to and/or receiving calls from stations outside the Centrex group. It may, however, make and/or receive outside calls indirectly via the attendant, Call Forwarding, Call Transfer and Call Pick-Up features.

#### 38. Simulated Facility Groups

Simulated Facility Groups restrict the number of simultaneous calls between the Centrex group and the public network. For example, a 100 line Centrex group could be limited to 20 simultaneous calls to/from the public network. This emulates the physical trunks to a similarly sized PBX.

#### 39. Speed Calling

Speed Calling 8 enables a station user to call a list of up to 8 pre-selected directory numbers by dialing one-digit codes instead of the directory numbers.

#### 40. Speed Calling 30 enables a station user to call a list of up to 30 pre-selected directory numbers by dialing two-digit codes instead of the directory numbers.

#### 41. Three-Way Calling

Three-Way Calling allows a station user to add a third party to an existing call, and thus enables a simultaneous conference between parties at multiple locations.

**Catalog of Toll and Local Business**  
**Effective: April 2, 2008**

Page 23

**The Chillicothe Telephone Company**

**CENTREX SERVICE**

**E. Definitions**

42. Tie Facility Access

Tie Facility Access allows the stations in a business to dial a special code to gain access to outgoing Tie Facilities. Access to Tie Facilities can be controlled or restricted by Simulated Facilities Groups.

43. Toll Restriction

Toll Restriction blocks the completion of calls that are directed to the outside operator or to numbers outside the local calling area. A Toll Restriction list may be assigned to either an individual line or shared by multiple lines.

44. Uniform Call Distribution

Uniform Call Distribution is intended to distribute calls evenly among the stations in a Multi-line Hunt Group. When a caller is connected to an idle station, the location of the next station is marked as the starting point for hunting when the next incoming call is received. Once hunting begins, it proceeds in a circular manner until an idle station is found.

45. Voice/Data Protection

Voice/Data Protection allows a station user to inhibit intrusion features such as Call Waiting and Operator Verification which are directed to that line when it is busy.

46. Voice Message Waiting – Stutter Dial Tone or Visual Indicator

This feature allows subscribers to benefit from Voice Mail capabilities. Unanswered or busy calls are delivered to the Voice Message System. An audible indication (stutter dial tone) or a visual indicator is provided when messages are waiting to be retrieved.

#### 47. Voice Paging Interface

Voice Paging Interface allows a caller in a Centrex group to dial an access code in order to reach a customer-provided on premise loudspeaker paging device.

### **Catalog of Toll and Local Business Effective: April 2, 2008**

Page 24

**The Chillicothe Telephone Company**

## **CENTREX SERVICE**

### **E. Definitions**

#### 48. Denied Originating

This feature, which is not subscriber programmable, permits a subscriber to deny call origination, but still receive incoming calls. Subscribers with Denied Origination are not given a dial tone when going off-hook. This is a helpful reminder that calls cannot be originated from this particular line.

#### 49. Denied Terminating

This feature denies terminating calls to a line programmed to deny terminating calls. This feature is not subscriber programmable. A caller attempting to terminate to a line marked for Denied Termination will hear a recorded announcement. Calls routed to the announcement because of Denied Termination are not charged to the caller. The

customer will not receive any indication of an attempted call.

**Catalog of Toll and Local Business  
Effective: April 2, 2008**

Page 25

**The Chillicothe Telephone Company**

**“CLASS” CALLING FEATURES (CUSTOM LOCAL  
AREA SIGNALLING SERVICES)**

**General  
Description**

The Telephone Company provides Custom Local Area Signalling Services (CLASS) in addition to regular local exchange service. CLASS features are central office-based

telecommunications services capable of providing several optional service enhancements. These services will be offered from central offices where the equipment and facilities are available. CLASS features cannot be functional unless both the called and calling parties are served by, and the call is routed through, appropriately equipped central offices, and routed over appropriately equipped facilities for calls between such equipped central offices. When a service cannot be functional, notification will be given that the call is outside the call area served by the service.

## **Service Descriptions**

### **a. Repeat Dialing**

Automatically redials the last outgoing number after the customer activates the service by dialing an activation code. Repeat Dialing monitors the busy line and performs a call set-up when both the originating and terminating lines become idle. After activation of the feature, the originating and terminating customers may place other calls without affecting the Repeat Dialing service status. This service may also be used to recall a called party after the conversation has been terminated.

### **b. Call Return**

Allows a customer to return the last incoming call unless the call is from a private or blocked number, whether or not it was answered. The customer dials an activation code and the last incoming call is automatically dialed. If the line is busy when the customer activates the service, a confirmation announcement is heard, the customer hangs up, and a queuing process begins. For the next thirty minutes both the calling and called parties' lines are checked periodically. The call set-up is made when both the originating and terminating lines are idle. After activation of the feature, the originating and terminating customers may place other calls without affecting the Call Return service status. Up to ten calls may be held in queue for the customer's Call Return activation.

### **c. Call Return Block**

Prohibits a customer who subscribes to Call Return from returning a call by activating the Call Return code. By dialing an activation code before placing a local call, a customer may "block" the called party from returning a call to them, using Call Return. This service is free to all customers who subscribe to a one-party line, and is available on a per call basis only. After activating the Call Return Block code and placing the call, the line reverts back to normal status and future calls will not be blocked from being returned by Call Return subscribers. The caller must activate the code before placing each call in order to have Call Return Block activated.

**The Chillicothe Telephone Company**

**“CLASS” CALLING FEATURES (CUSTOM LOCAL  
AREA SIGNALLING SERVICES)**

**Service Descriptions (Cont.)**

d. Caller ID

Allows the customer to view the telephone number of the calling party when receiving a telephone call. The telephone number of the calling party is displayed on a customer-provided display device. However, the calling party may subscribe to services which will prevent the disclosure of their telephone number. In such instances, a privacy indication will appear on the customer-provided display device instead of the calling party's telephone number. Customers can either subscribe to this service or Caller ID Name and Number which delivers the name and number of the calling party. (See paragraph e. below.)

e. Caller ID Name & Number

Allows the customer to view the name and telephone number of the calling party before answering a call. A customer-provided special display telephone or call display unit is required. Calls from out of the local calling area will be shown as “out of the area” or “unavailable” if not connected by Signaling System 7 (SS7). Calls from customers who have used Select Line Blocking or Universal Per Call Blocking will be shown as “private” or “anonymous”. Caller ID Name and Number is available where facilities permit. If the customer only needs delivery of the telephone number, they would subscribe to Caller ID. (See paragraph d. above.)

f. Selective Call Reject

Provides the customer with a method of blocking calls from certain numbers, which may or may not be known to the customer. The customer may create a screening list of up to nine (9) telephone numbers, and place them in network memory through an interactive dialing sequence. The customer may also activate the service after receiving a call, and thus place the number associated with that call on the Selective Call Reject screening list. To activate the feature, the customer dials an activation code and the telephone number of each incoming call is checked against the customer's Selective Call Reject screening list.

g. Anonymous Call Rejection

Anonymous Call Rejection allows the customer to program their line to universally block all calls that arrive as a private or blocked number delivery call. By dialing an activation code,

the blocking function will be activated and no private or blocked number delivery calls will get through. The customer will hear a confirmation recording that the feature is activated. Another code is dialed to deactivate. The customer will hear a confirmation recording that the feature has been deactivated. The calling party receives a denial announcement that the private call is being rejected, to hang up, remove the block from their number and call again.

**Catalog of Toll and Local Business  
Effective: April 2, 2008**

Page 27

**The Chillicothe Telephone Company**

**“CLASS” CALLING FEATURES (CUSTOM LOCAL  
AREA SIGNALLING SERVICES)**

**Service Descriptions (Cont.)**

h. Selective Call Forwarding

Allows customers to create a special list of telephone numbers and a destination number through an interactive dialing sequence. By dialing an activation code, the customer activates the service. Only incoming calls from numbers appearing on the list will be forwarded to the predetermined remote station.

i. Selective Call Forwarding - Remote Activation

Allows customers who subscribe to Selective Call Forwarding to activate their feature from a remote location. By dialing a special seven digit telephone number, entering their own telephone number and an assigned four-digit PIN number, they can select the remote number to which the selected numbers may be forwarded or change the numbers on their selected list.

j. Distinctive Ringing / Call Waiting

Allows customers to designate several numbers that will be recognized immediately as important calls by means of distinctive alerting signal. Up to nine (9) numbers may be added to the screening list through an interactive dialing sequence. The customer then dials an activation code that activates the service. When the incoming call is identified as one of the numbers on the list, a distinctive ring will be produced in the customer's telephone to alert

them that an important call is coming in. If the customer is using the phone and one of the selected numbers comes through on Call Waiting, the customer will receive a distinctive call waiting signal to let them know an important call is awaiting them.

k. Universal per Call Blocking

Allows the customer to prevent the disclosure of his name and/or telephone number to a called party. By dialing an activation code, the customer may block delivery of his name and/or telephone number. If the called party has a customer-provided display device, they will see a private status message in place of the calling name and/or number. This service is provided on a universal basis, where technically possible, at no monthly charge. All Payphone Service lines in the Chillicothe Telephone Company's service area will be equipped with Universal per Call Blocking.

**Catalog of Toll and Local Business  
Effective: April 2, 2008**

Page 28

**The Chillicothe Telephone Company**

**“CLASS” CALLING FEATURES (CUSTOM LOCAL  
AREA SIGNALLING SERVICES)**

**Service Descriptions (Cont.)**

l. Select per Line Blocking

Prevents disclosure of a customer's name and/or telephone number on all outgoing calls, without the necessity of an activation code. If the called party has a display device, a private status message will be displayed instead of the calling party's name and/or telephone number. This service will be provided to all non-published customers at no monthly charge, where technically possible, upon request from the customer. The service is also available to published customers, where technically possible, at a monthly charge of \$1.00. Deactivation

of the blocking of their name and/or number is available to both published and non-published customers, at their discretion. To deactivate the privacy status, the customer would dial a deactivation code before placing a call. This will allow delivery of their name and/or telephone number to the calling party. After completion of the call, the line reverts back to the privacy status. Law Enforcement, Domestic Shelters, and other special agencies will be offered free Select per Line Blocking.

m. Call Trace

Call Trace allows customers to request an automatic trace of the last call received by dialing an activation code immediately following termination of the last incoming call. The customer will hear a recording explaining the charges and how to proceed with or terminate the trace. An announcement will also inform the customer if the trace has been successful and offers a number to call for further instructions.

n. Call Trace Removal

Call Trace Removal is available to customers at no cost if they find that the Call Trace procedures are being abused by causing high monthly activation charges. A release form must be signed absolving the Telephone Company from non-availability of Call Trace activity. The \$6.55 non-recurring charge would apply to add the Call Trace back to their line.

o. Toll Restriction with PIN

This feature gives the subscriber the option of denying toll access to all users from their line with the exception of those using a four digit PIN number. Only one PIN per line may be assigned. The subscriber may pick the initial PIN or the Telephone Company can assign the initial PIN. Thereafter the subscriber may dial an access code and change the PIN themselves.

## Service Descriptions (Cont.)

### p. Incoming Call Control

Incoming Call Control intercepts calls that are marked “unavailable”, “out-of-area”, “unknown”, or “anonymous” on Caller ID units. When unidentified callers dial the subscriber’s number, they will receive an announcement informing them that, “the number you have reached does not accept calls from telemarketers. If you are a telemarketer, please add this number to your Do Not Call list and hang up now. Otherwise, please press „1” or stay on the line”.

The subscriber’s Caller ID CPE (customer provided equipment) will still display the calling party’s classification (e.g. unknown number or out-of-area). The subscriber must subscribe to a Caller ID service in order to subscribe to Incoming Call Control because the feature dips in to the Caller ID database to determine the caller’s classification.

## Rates and Charges

The following monthly rates and non-recurring charges apply to Custom Local Area Signalling Services (CLASS), and are in addition to the rates and charges applicable to any associated service, equipment and facilities.

### 1. Recurring Charges

#### Monthly Rate Per Line Equipped

a. Repeat Dialing \$ 6.00 b. Call Return 6.00 c. Call Return Block \* No Monthly Charge  
d. Caller ID (delivers telephone # only) 6.00 e. Caller ID Name & Number 8.00 f.  
Selective Call Reject 6.00 g. Anonymous Call Rejection 1.00 h. Selective Call  
Forwarding 6.00 i. Selective Call Forwarding - Remote Activation\* .50 j. Distinctive  
Ringing / Call Waiting 6.00 k. Universal Per Call Blocking (per call blocking)\* No  
Monthly Charge l. Select Per Line Blocking (per line blocking)\* 1.00  
(Customers with non-published numbers) No Charge m. Call Trace\* 3.00 per activation n.  
Call Trace Removal No Monthly Charge o. Toll Restriction with PIN\* 3.00 p. Incoming  
Call Control\* 3.00

AREA SIGNALLING SERVICES)**

**Rates and Charges**

2. Discounts

The following discounts are available to customers who subscribe to more than one CLASS feature.

|   |             |
|---|-------------|
| 2nd feature .....                                   | \$ 2.00 per |
| month 3rd feature .....                             | \$ 2.00 per |
| month 4 or more features, additional discount ..... | \$ 1.00 per |
| month   |             |

3. Non-Recurring

A non-recurring charge applies to establish or change to new and/or additional CLASS features, except when the change results only in the removal of one or more CLASS features.

**Non-Recurring Charge  
Per Line Equipped**

- a. Repeat Dialing \$6.55 b. Call Return 6.55 c. Call Return Block None d. Caller ID (delivers telephone no. only) 6.55 e. Caller ID Name and Number 6.55 f. Selective Call Reject 6.55 g. Anonymous Call Rejection 6.55 h. Selective Call Forwarding 6.55 i. Selective Call Forwarding – Remote Activation 6.55 j. Distinctive Ringing / Call Waiting 6.55 k. Universal Per Call Blocking (per call blocking) None l. Select Per line Blocking (per line blocking) 6.55 m. Call Trace\* None\* n. Call Trace Removal\* None\* o. Toll Restriction with PIN 6.55 p. Incoming Call Control 6.55

Customers ordering more than one CLASS feature, on the same line, at the same time and at the same address, will only be billed one non-recurring charge.

\* If a customer requests Call Trace Removal then later decides to activate Call Trace, a \$6.55 NRC will apply.

**The Chillicothe Telephone Company**

**CUSTOM CALLING SERVICE**

**General  
Description**

Custom Calling Services are special services or features available that allow customers to choose how they manage incoming and outgoing calls.

**Service Descriptions**

a. Speed Calling

Speed Calling permits the customer to place local and message toll calls to a preselected group of telephone numbers by dialing abbreviated codes. Speed Calling is provided in capacities of eight or thirty telephone numbers.

b. Three-Party Conference

Three Party Conference permits the customer to add a third party to an existing connection thereby establishing a three-way conference call. If the customer wants the ability to hang up and let the remaining two parties continue talking, they must subscribe to Three Party Conference with Transfer. Both features are offered at the same monthly rate.

c. Three-Party Conference with Transfer

Same as Three Party Conference except the originating party can hang up and the remaining parties can continue talking.

d. Call Waiting

Call Waiting permits the customer, upon receipt of a tone signal indicating that a call is waiting, to place the existing call on hold and answer the second waiting call. Cancel Call Waiting is an enhancement that is automatically provided to all Call Waiting customers at no

additional cost. Cancel Call Waiting allows a customer to cancel the Call Waiting feature on a per call basis.

e. Hot Line

The Hot Line feature requires a non-dial telephone instrument and when placed in an off-hook condition the line is programmed to automatically route the call to a predetermined telephone number.

f. Warm Line

The Warm Line feature provides a direct routing of a call to a predetermined telephone number without dialing. The Warm Line is programmed to automatically route a call to a predetermined telephone number when off-hook for a specified time period.

**Catalog of Toll and Local Business  
Effective: April 2, 2008**

Page 32

**The Chillicothe Telephone Company**

**“CLASS” CALLING FEATURES (CUSTOM LOCAL  
AREA SIGNALLING SERVICES)**

**Service Descriptions (Cont.)**

d. Caller ID

Allows the customer to view the telephone number of the calling party when receiving a telephone call. The telephone number of the calling party is displayed on a customer-provided display device. However, the calling party may subscribe to services which will prevent the disclosure of their telephone number. In such instances, a privacy indication will appear on the customer-provided display device instead of the calling party's telephone number. Customers can either subscribe to this service or Caller ID Name and Number which delivers the name and number of the calling party. (See paragraph e. below.)

e. Caller ID Name & Number

Allows the customer to view the name and telephone number of the calling party before

answering a call. A customer-provided special display telephone or call display unit is required. Calls from out of the local calling area will be shown as “out of the area” or “unavailable” if not connected by Signaling System 7 (SS7). Calls from customers who have used Select Line Blocking or Universal Per Call Blocking will be shown as “private” or “anonymous”. Caller ID Name and Number is available where facilities permit. If the customer only needs delivery of the telephone number, they would subscribe to Caller ID. (See paragraph d. above.)

f. Selective Call Reject

Provides the customer with a method of blocking calls from certain numbers, which may or may not be known to the customer. The customer may create a screening list of up to nine (9) telephone numbers, and place them in network memory through an interactive dialing sequence. The customer may also activate the service after receiving a call, and thus place the number associated with that call on the Selective Call Reject screening list. To activate the feature, the customer dials an activation code and the telephone number of each incoming call is checked against the customer’s Selective Call Reject screening list.

g. Anonymous Call Rejection

Anonymous Call Rejection allows the customer to program their line to universally block all calls that arrive as a private or blocked number delivery call. By dialing an activation code, the blocking function will be activated and no private or blocked number delivery calls will get through. The customer will hear a confirmation recording that the feature is activated. Another code is dialed to deactivate. The customer will hear a confirmation recording that the feature has been deactivated. The calling party receives a denial announcement that the private call is being rejected, to hang up, remove the block from their number and call again.

**Catalog of Toll and Local Business  
Effective: April 2, 2008**

Page 27

**The Chillicothe Telephone Company**

**CUSTOM CALLING SERVICE**

**Conditions & Limitations**

Custom Calling Features are offered subject to the availability of facilities.

**Rate  
s**

1. The following monthly rates are in addition to basic local exchange service and any other service, equipment or facilities subscribed to by the customer.
2. The following monthly rates apply per line when one Custom Calling feature is provided on a line.

| Monthly Rate   | Current Feature                   |
|--|-----------------------------------|
| a. Speed Calling - 8 number capacity \$ 2.50 - 30 number capacity 4.00 | b. Three Party Conference 2.50    |
| c. Three Party Conference with Transfer 2.50                           | d. Call Waiting (2) 4.00          |
| e. Hot Line 1.85   | f. Warm Line 1.85                 |
| g. Call Forwarding 3.00  | h. Inquiry Only 2.50              |
| i. Customer Identified Number Assignment (CINA)/Special Ring 1.55      | j. Denied Originating 2.00        |
| k. Denied Terminating 2.00   | l. Selective Call Acceptance 1.00 |
| m. Six Party Conference 3.00   |                                   |

**Discount  
s**

When more than one Custom Calling feature is provided on a line, the following discounts apply:

2 features \$ .25 per feature discount  
3 or more features .50 per feature discount

## **CENTRAL OFFICE MULTIPLEXING AND CROSS CONNECT SERVICES**

### **A. Description**

Central Office Multiplexing is a wire center based optional service that either derives multiple transmission paths from a single transmission source or combines multiple transmission sources into a single transmission path. Central Office Multiplexing is available in the following configurations:

- DS1 (Analog, Company exchange rate service or Horizon DDCS 128, 256, 384 Service) is a serving arrangement that either converts a DS1 into twenty-four channels for use with Analog, Company exchange rate service or DDCS 128, 256, 384 Service or converts twenty-four Analog, Company exchange rate service or DDCS 128, 256, 384 Service channels into a DS1 channel.

Multiplexer Cross-Connection (MCC) is an arrangement that allows one channel of a multiplexed Horizon DS1 Service to be connected to one channel of the same bit rate and like signaling of another multiplexed Horizon DS1 Service. The lesser speed channel may be either an analog channel or a DDCS channel provided at 64 Kbps of bandwidth between the two DS1 multiplexers. MCC will be provided at all, or between two, Company locations where multiplexing is performed.

### **B. Definitions**

#### **Cascade Multiplexing**

Occurs when a higher speed channel is de-multiplexed to provide channels of a lesser capacity and one of the lesser capacity channels is further de-multiplexed.

#### **Hub Rearrangement**

Occurs when an existing channelized Company digital service between a customer premise and a hub location is multiplexed onto a new higher speed Company digital service at the hub.

**Catalog of Toll and Local Business  
Effective: April 2, 2008**

Page 35

**The Chillicothe Telephone Company**

**CENTRAL OFFICE MULTIPLEXING AND CROSS CONNECT  
SERVICES**

**C. Terms and Conditions**

1. Central Office Multiplexing can only be ordered in conjunction with Horizon DS1 Service.
2. End to end services may be provided via Central Office Multiplexing. The transmission parameters of the end to end service thus provided will be that of the lower capacity or bit rate.
3. A customer of the Cross Connect Service must purchase service to the wire center from his designated premises. One charge applies per service cross-connected.
4. A Hub Rearrangement charge applies only when; neither customer location changes, the existing multiplexer associated with the lower speed services is not physically moved, and all rearranged facilities are included in one customer request.
5. When Cascade Multiplexing is performed, whether in the same or different locations, a charge for the additional multiplexing unit also applies. Channel Mileage Termination and Channel Mileage charges apply between multiplexer locations.

### **F. Pricing**

#### **2. Payment Plans**

##### **• Month-to-Month**

Interconnection Central Office Multiplexing is available on a month-to-month basis.

##### **• Term Payment Plans**

Interconnection Central Office Multiplexing is available under the Term Payment Plan (TPP) whereby customers may elect to pay a fixed rate for a 12, 36 or 60 month period. After the minimum period is satisfied, the monthly rate will apply unless a new TPP is selected.

#### **3. Termination Charges**

Termination Charges will apply to service terminated prior to the contracted period. The termination charge for all TPP terms for Central Office Multiplexing and Cross Connect Services will be 50% of the remaining monthly obligation for the term selected.

P.U.C.O. approval of the above termination liability language is not intended to indicate that the P.U.C.O. has sanctioned any particular legal result should a dispute arise between the parties. In the event of a dispute, signatories to such contracts may pursue

whatever legal remedies they deem appropriate to resolve the dispute.

## **DEDICATED DIGITAL COMMUNICATIONS SERVICE (DDCS)**

### **A. Description**

DDCS 128, 256, and 384 Service provides for the simultaneous two-way transmission of a serial, bipolar, return-to-zero, isochronous digital signal at speeds of 128, 256 and 384 Kbps. The service is available in a two-point configuration only between:

- Two customer-designated premises.
- A customer-designated premise and a Chillicothe Telephone (Company) wire center where cross-connection or hubbing is performed.

### **B. Definitions**

#### **DS1**

A service which provides for the simultaneous two-way transmission of a serial, bipolar, return-to-zero, isochronous digital signal at a terminating bit rate of 1.544 megabits per second (Mbps). Timing is provided by the Company through the Company's facilities to the customer in the receiving bit stream.

### **C. Terms and Conditions**

DDCS 128, 256 and 384 Service is provided at the option of the Company where facilities permit. If appropriate facilities are not available, *Special Construction* charges may apply.

### **D. Optional Features**

#### **Central Office Multiplexing and Cross Connect Services**

These optional services are available with DDCS 128, 256 and 384 Service. Refer to Central Office Multiplexing and Cross Connect Services elsewhere in this catalog.

### **3. Payment Plans**

- **Month-to-Month**

DDCS Service is available on a month-to-month basis.

- **Term Payment Plans**

DDCS 128, 256 and 384 Service is available under the Term Payment Plan (TPP) whereby customers may elect to pay a fixed rate for a 12, 36 or 60 month period. After the minimum period is satisfied, the monthly rate will apply unless a new TPP is selected.

### **4. Termination Charges**

Termination Charges will apply to service terminated prior to the contracted period. The termination charge for all TPP terms for DDCS 128, 256 and 384 Service will be 50% of the remaining monthly obligation for the term selected.

P.U.C.O. approval of the above termination liability language is not intended to indicate that the P.U.C.O. has sanctioned any particular legal result should a dispute arise between the parties. In the event of a dispute, signators to such contracts may pursue whatever legal remedies they deem appropriate to resolve the dispute.

**Catalog of Toll and Local Business  
Effective: April 2, 2008**

Page 45

**The Chillicothe Telephone Company**

**DIRECT INWARD DIALING**

**Direct Inward Dialing (DID) to Switching Systems Located on Customer Premises**

**A. General**

1. DID service is furnished subject to the availability of facilities and numbers. This service is furnished from a Telephone Company central office on trunk lines (excluding FX and WATS) to customer premises switching equipment equipped for compatible DID operation.
2. This service includes the central office switching equipment necessary for inward dialing from the central office directly to stations associated with the customer premises switching equipment.
3. This service must be provided on all lines in a central office trunk group that are arranged for inward service. Each trunk group equipped with DID will be billed as a separate

service.

4. The rates and charges specified in B. following contemplate the use of equipment and serving arrangements considered standard by the Telephone Company. If non-standard equipment or service is requested and provided, rates and charges will be based on the costs involved.
5. When DID service is furnished in connection with customer premises equipment, regulations, and charges for interconnection, for maintenance of service, and general regulations apply as specified in this catalog. Operational characteristics of interface signals between the Telephone Company provided interconnection and the customer provided switching equipment must conform to the rules and regulations the Telephone Company considers necessary to maintain proper standards.
6. The Telephone Company shall not be responsible to the customer of authorized user if changes in the Telephone Company's protection criteria, facilities, operations or procedures cause the facilities provided by a customer or authorized user to be obsolete, or require modification.
7. One primary listing will be furnished without charge for each separate trunk group as specified in the Company's tariff and elsewhere in this catalog. Additional charges apply for additional listings.
8. Customer premises equipment must be arranged by the customer to provide for the interception of calls to vacant and non-working assigned DID numbers.
9. DID numbers in groups of 100 may be reserved for future use at rates specified in this catalog. The Telephone Company does not guarantee to provide reserve numbers arranged in a consecutive manner. The Telephone Company will be responsible for interception and administration of these numbers.

**Catalog of Toll and Local Business  
Effective: April 2, 2008**

Page 46

**The Chillicothe Telephone Company**

**DIRECT INWARD DIALING**

B. Rates

The following rates and charges apply in addition to the rates and charges applicable to any other service or equipment which this service is associated, e.g. trunk like rate:

DID Service for: Monthly Rate

10 DID numbers \$ 11.75

100 DID numbers \$ 73.30

DID Trunk Termination in central office, each \$ 47.00  
(in addition to Trunk Line charge)

**The Chillicothe Telephone Company**

**DIRECTORY  
LISTINGS**

**General**

The following rates and regulations for directory listings apply to primary and additional listings in the Company's directory.

The directory is an alphabetical list of customers and others for whom directory listings are provided and is designed solely for the purpose of informing calling persons of desired telephone numbers. Accordingly, listings are intended solely for the purposes of identification and are limited to information which is essential to such identification.

Special arrangement of names is not permitted; not is the listing of a service, commodity, or trade name, except when such is a part of the name under which the listed party is doing business.

The Telephone Company will refuse a listing which does not constitute a legally authorized or adopted name, and any listing which, in the opinion of the Telephone Company, is likely to mislead or deceive calling persons as to the identity of the listed party, or is intended for advertising purposes or to secure a preferential position in the directory or is more elaborate than is reasonably necessary to identify the listed party. The Telephone Company, upon notification to the customer, will withdraw any listing which is found to be in violation of its rules.

The length of any listing is limited by the use of abbreviations where, in the opinion of the Telephone Company, the clarity of the listing and the identification of the listed party is not impaired. When more than one line is required to properly list a party, no additional charges will apply.

In connection with business service, a descriptive term characterizing the listed party's business in a general way, is furnished (in abbreviated form) as a part of the listing where desired. However, when the character of the listed party's business is already apparent from the form of the corporate or firm name, the business designation is unnecessary and is not furnished.

The form of listings must conform to the Telephone Company's specifications with respect to its directories.

Listings are regularly provided in connection with exchange service of all classes, grades and types.

**Catalog of Toll and Local  
Business Effective: April 2, 2008**

Page  
48

**The Chillicothe Telephone Company**

**DIRECTORY  
LISTINGS**

**Primary  
Listing**

One listing without charge, termed the primary listing, is provided for each call number in connection with individuals and party lines, rural line key system trunk and private-branch-exchange trunk lines. Toll terminals are not listed in the directory. In cases where two or more consecutively numbered lines are arranged in a group for rotary service, all of such lines so arranged constitute but one call number.

The primary listing is ordinarily the name of the customer or the name under which a business is regularly conducted. Where the service is contracted for by one party for the use of a second party, the primary listing may be the name of the second party.

**Regular Additional  
Listings**

Business additional listings are listings in addition to the primary listing furnished in connection with business service and may be: the names of partners or members, if the customer is a partnership; the names of officers, if the customer is a corporation; and, for any business establishment, the names of representatives or employees of the customer. Business additional

listings may also be the bona fide names of firms which the customer owns or controls or is duly authorized to represent.

Business additional listings are not permitted in connection with residence service.

Ordinarily, all additional listings are of the same address and telephone number as the primary listing, except as provided below for alternate listings. However, when it appears necessary as an aid to the use of the directory and provided satisfactory service can be furnished, a listing will be permitted under the address of a private-branch-exchange station or extension station installed on premises of the customer, but at an address different from that of the switchboard or main station.

**The monthly rate for each regular additional listing for a business is \$ 1.95.**

**The Chillicothe Telephone Company**

**DS1 SERVICE**

**A. Description**

Horizon DS1 Service provides for the simultaneous two-way transmission of a serial, bipolar, return-to-zero, isochronous digital signal at a terminating bit rate of 1.544 megabits per second (Mbps). Timing is provided by the Company through the Company's facilities to the customer in the receiving bit stream. The service is available in a point-to-point configuration

between:

- Two customer-designated premises.
- A Company wire center or customer-designated premise and a Company wire center where multiplexing, hubbing or cross-connection functions are performed.
- Two Centrex locations.

## **B. Definitions**

### **Extended Superframe (ESF) Format**

A signaling framing format for DS1 services consisting of frames with 192 information digit time slots preceded by a one digit time slot containing a Frame (F) bit. The ESF framing format consists of 24 consecutive frames as above in a structure where the F bits are divided into three groups used for framing, monitoring and datalink functions according to detailed specifications contained in industry standard ANSI T1.403-1995.

### **Superframe (SF or D4) Format**

A signal framing format for DS1 services consisting of frames with 192 information digit time slots preceded by a one digit time slot containing a Frame (F) bit. The SF or D4 framing format consists of twelve consecutive frames as above in a structure where the F bits are used for framing only and are divided into two groups used for terminal framing and signaling framing functions according to detailed specifications contained in industry standard ANSI T1.403-1995.

## **C. Terms and Conditions**

Horizon DS1 Service is provided at the option of the Company where facilities permit. If appropriate facilities are not available, *Special Construction* charges may apply.

**The Chillicothe Telephone Company**

**DS1 SERVICE**

**D. Optional Features**

**Central Office Multiplexing and Cross Connect Services**

These optional services are available with Horizon DS1 Service. Refer to Central Office Multiplexing and Cross Connect Services in Section 8 of this tariff.

**Clear Channel Capability**

Is an arrangement which allows a customer to transport 1.536 Mbps of information on a Horizon DS1 Service with no constraint on the quantity or sequence of one and zero bits. Clear Channel Capability is a required option when 64 Kbps channels are multiplexed onto Horizon DS1 Service. Clear Channel Capability is only provided on non-channelized circuits between two customer premises where facilities permit.

**Extended Superframe**

Is available as a non-chargeable, customer-specified option.

**Superframe**

Effective: April 2, 2008**

Page 54

**The Chillicothe Telephone Company**

**EXCHANGE  
SERVICES**

**1. Selective Call Screening Service**

(Originating Line Screening)

Selective Call Screening Service or Originating Line Screening (OLS) is a two-digit code passed by the Telephone Company's local central office switch with the Automatic Number Identification (ANI) at the beginning of a call that provides information about the line originating the call. The information provided in the two-digit code is designed to inform the exchange or interexchange and/or the operator service provider about certain service classes or special characteristics of the billing number associated with the line originating the call. Under this arrangement, operators accept only those originating toll calls that are made collect, billed to a third number, or billed to a calling card.

A. Selective Call Screening is offered subject to the availability of suitable facilities and equipment.

- B. The minimum contract period for Selective Call Screening is one month.
- C. Customers subscribing to Selective Call Screening are responsible for all toll charges billed to their lines, which are not carried solely over the Telephone Company's facilities.
- D. This service is offered to single party residence and business lines and trunk lines.
- E. If a call originates with the Company but is not carried solely over the Company's facilities, the Company will send, with the ANI, the two-digit code that identifies the call as being selectively screened. The Company assumes no liability for calls completed by any other entity or carrier, as long as the two-digit code accompanies the ANI forwarded to the other carrier. The Company is responsible for properly handling calls which are selectively screened and are not carried over any other carrier's network or facilities.

Nonrecurring Monthly Rate

Selective Call Screening, per line \*\* \$5.60

\*\* A Secondary Service Order charge applies as shown in the General Exchange Tariff.  
No installation charges apply for this service when ordered on an Initial Service Order.

**EXCHANGE  
SERVICES**

## 2. Billed Number Screening Service (BNS)

### A. General

Billed Number Screening Service is available to subscribers of the Company's local exchange services. This service is intended to prevent the charging of collect and/or third number billed calls to a customer's telephone number.

### B. Regulations

1. The Company will place information required to utilize Billed Number Screening Service in the Line Information Database (LIDB) or other database necessary to implement Billed Number Screening Service. In the event a call is placed and charged to a number which should have been prevented by Billed Number Screening, the Company makes no guarantee and assumes no liability arising out of the use or misuse of Billed Number Screening Service by any other entities, including, but not limited to, Interexchange Carriers. The Company is fully responsible for calls charged to numbers which should have been prevented by Billed Number Screening Service, that originate and terminate within the Company's service territory, and are carried over no other carrier's network or facilities.
2. Billed Number Screening Service is offered subject to the availability of suitable facilities.
3. The minimum contract period for Billed Number Screening Service is one month.

### C. Rates

1. The following rates and charges apply to the Company's provision of Billed Number Screening Service and are in addition to all other customer charges as specified elsewhere in the Company's tariffs.

Monthly Nonrecurring  
Rate Charge

- (a) Option 1 – No Collect or No charge \*\*  
Third Number Billing,
- (b) Option 2 – No Third Number No charge \*\*  
Billing
- (c) Option 3 – No Collect Billing No charge \*\*

\*\* A Secondary Service Order charge applies as shown in the General Exchange Tariff.  
No installation charges apply for this service when ordered on and Initial Service Order.

Selective Call Screening Service (Originating Line Screening)

Selective Call Screening Service or Originating Line Screening (OLS) is a two-digit code passed by the Telephone Company's local central office switch with the Automatic Number Identification (ANI) at the beginning of a call that provides information about the line originating the call. The information provided in the two-digit code is designed to inform the exchange or interexchange and/or the operator service provider about certain service classes or special characteristics of the billing number associated with the line originating the call. Under this arrangement, operators accept only those originating toll calls that are made collect, billed to a third number, or billed to a calling card.

- A. Selective Call Screening is offered subject to the availability of suitable facilities and equipment.
- B. The minimum contract period for Selective Call Screening is one month.
- C. Customers subscribing to Selective Call Screening are responsible for all toll charges billed to their lines, which are not carried solely over the Telephone Company's facilities.
- D. This service is offered to single party residence and business lines and trunk lines.
- E. If a call originates with the Company but is not carried solely over the Company's facilities, the Company will send, with the ANI, the two-digit code that identifies the call as being selectively screened. The Company assumes no liability for calls completed by any other entity or carrier, as long as the two-digit code accompanies the ANI forwarded to the other carrier. The Company is responsible for properly handling calls which are selectively screened and are not carried over any other carrier's network or facilities.

Nonrecurring Monthly Rate

Billed Number Screening Service (BNS)

A. General

Billed Number Screening Service is available to subscribers of the Company's local exchange services. This service is intended to prevent the charging of collect and/or third number billed calls to a customer's telephone number.

B. Regulations

1. The Company will place information required to utilize Billed Number Screening Service in the Line Information Database (LIDB) or other database necessary to implement Billed Number Screening Service. In the event a call is placed and charged to a number which should have been prevented by Billed Number Screening, the Company makes no guarantee and assumes no liability arising out of the use or misuse of Billed Number Screening Service by any other entities, including, but not limited to, Interexchange Carriers. The Company is fully responsible for calls charged to numbers which should have been prevented by Billed Number Screening Service, that originate and terminate within the Company's service territory, and are carried over no other carrier's network or facilities.
2. Billed Number Screening Service is offered subject to the availability of suitable facilities.
3. The minimum contract period for Billed Number Screening Service is one month.

CUSTOM CALLING SERVICE

A. General

1. The Telephone Company provides Custom Calling Service which includes one or more of the following features:

a. Speed Calling

Speed Calling permits the customer to place local and message toll calls to a preselected group of telephone numbers by dialing abbreviated codes. Speed Calling is provided in capacities of eight or thirty telephone numbers.

b. Three Party Conference

Three Party Conference permits the customer to add a third party to an existing connection thereby establishing a three-way conference call. If the customer wants the ability to hang up and let the remaining two parties continue talking, they must subscribe to Three Party Conference with Transfer. Both features are offered at the same monthly rate.

c. Three Party Conference with Transfer

Same as Three Party Conference except the originating party can hang up and the remaining parties can continue talking.

d. Call Waiting

Call Waiting permits the customer, upon receipt of a tone signal indicating that a call is waiting, to place the existing call on hold and answer the second waiting call. Cancel Call Waiting is an enhancement that is automatically provided to all Call Waiting customers at no additional cost. Cancel Call Waiting allows a customer to cancel the Call Waiting feature on a per call basis.

e. Hot Line

The Hot Line feature requires a non-dial telephone instrument and when placed in an off-hook condition the line is programmed to automatically route the call to a predetermined telephone number.

(M)

(M)

#### CUSTOM CALLING SERVICE

##### A. General (Cont'd)

###### f. Warm Line

The Warm Line feature provides a direct routing of a call to a predetermined telephone number without dialing. The Warm Line is programmed to automatically route a call to a predetermined telephone number when off-hook for a specified time period.

###### g. Call Forwarding

Call Forwarding permits the customer to place a call on hold, originate a new call and then consult privately with the second party.

###### h. Inquiry Only

Inquiry Only permits the customer to place a call on hold, originate a new call and then consult privately with the second party.

###### i. Customer Identified Number Assignment (CINA)/Special Ring

Customer Identified Number Assignment (CINA)/Special Ring permits a second directory number assigned to the same telephone line.

###### j. Denied Originating

This feature, which is not subscriber programmable, permits a subscriber to deny call origination, but still receive incoming calls. Subscribers with Denied Origination are not given a dial tone when going off-hook. This is a helpful reminder to the subscriber that calls cannot be originated from this particular line. This feature is available to business customers only.

###### k. Denied Terminating

This feature denies terminating calls to a line programmed to deny terminating calls. This feature is not subscriber programmable. A caller attempting to terminate to a line marked for Denied Termination will hear a recorded announcement. Calls routed to the announcement because of Denied Termination are not charged to the caller. The customer will not receive any indication of an attempted call. This feature is available to business customers only.

### LOCAL DIRECTORY ASSISTANCE AND OPERATOR ASSISTED CALLS

#### A. Local Operator Assisted Calls

1. Definition of Service - Local Operator Assisted Calls is a service which provides for the assistance of an operator of The Chillicothe Telephone Company, or an automated operator when such assistance is requested by a calling party in completing a local call, and the calling party requests that the local call be billed collect, or billed to a calling card number, or billed collect station-to-station, or collect person-to-person.
2. Rates - The rates for the various services described in Paragraph (1) can be found in the Company's catalog at [www.horizontel.com](http://www.horizontel.com).
3. In addition to the rates appearing in Paragraph (2), the appropriate tariffed local message charge will also be billed to the entity designated by the originating calling party.

#### B. Local Directory Assistance

Local Directory Assistance (DA) is a service that provides published telephone numbers or an indication of "non-published status" for the local serving area.

##### 1. Regulations

- a. The number of telephone numbers furnished on each call is limited to two.
- b. Services furnished to the following are exempt from charges for Local Directory Assistance:

(1) Long term care facility patients (2)  
Persons with sight disability

##### 2. Rate \$1.50 per call (l)

##### 3. Block

A Local Directory Assistance (DA) block is available to residential and business customers upon request for a one time per line non-recurring charge. This block will prevent access to local directory assistance.

Non-recurring charge \$9.95 per line

## CUSTOM LOCAL AREA SIGNALLING SERVICES (CLASS)

### A. General

1. The Telephone Company provides Custom Local Area Signalling Services (CLASS) which includes one or more of the following:

- a. Repeat Dialing

Automatically redials the last outgoing number after the customer activates the service by dialing an activation code. Repeat Dialing monitors the busy line and performs a call set-up when both the originating and terminating lines become idle. After activation of the feature, the originating and terminating customers may place other calls without affecting the Repeat Dialing service status. This service may also be used to recall a called party after the conversation has been terminated.

- b. Call Return

Enables a customer to return the last incoming call unless the call is from a private or blocked number, whether or not it was answered. The customer dials an activation code and the last incoming call is automatically dialed. If the line is busy when the customer activates the service, a confirmation announcement is heard, the customer hangs up, and a queuing process begins. For the next thirty minutes both the calling and called parties' lines are checked periodically. The call set-up is made when both the originating and terminating lines are idle. After activation of the feature, the originating and terminating customers may place other calls without affecting the Call Return service status. Up to ten calls may be held in queue for the customer's Call Return activation.

- c. Call Return Block

Prohibits a customer who subscribes to Call Return from returning a call by activating the Call Return code. By dialing an activation code before placing a local call, a customer may "block" the called party from returning a call to them, using Call Return. This service is free to all customers who subscribe to a one-party line, and is available on a per call basis only. After activating the Call Return Block code and placing the call, the line reverts back to normal status and future calls will not be blocked from being returned by Call Return subscribers. The caller must activate the code before placing each call in order to have Call Return Block activated.
