

# HORIZON

# HOSTED VOICE

Horizon Hosted Voice will keep your team connected. Voice over Fiber provides HD Voice quality, reliability and mobility. Hosted Voice is scalable and dynamic, allowing you to add seats as you grow. Do away with expensive hardware voice solutions and move to Horizon Hosted Voice.

Hosted Voice Services are delivered via Horizon's Fiber network and can be added with other Horizon services like Ethernet, DIA(Dedicated Internet Access), Dark Fiber, or Wavelengths. Separate individual circuits are established for Hosted Voice services to eliminate dependencies or interference with other delivered services.

## Why Choose Horizon for Hosted Voice?

- Unified Communications – Integrates desktop, handsets and mobility devices under one platform.
- Feature Rich – More than 100 IP calling features, plus robust Auto Attendant functionality.
- Portals for Self-Management – Users and Administrators can adjust features quickly and easily.
- Competitive Call Plans – Rates that allow you to stay connected to your vendors and clients.
- Cloud-Based Implementation – Reduces capital and maintenance expenses.

## Horizon Hosted Voice Features and Specifications

- Hosted Voice Stations – Fully featured cloud based desktop phones, providing voice services to all employees and conference rooms.
- Hosted SIP Trunks – IP trunks provide connectivity to customer owned PBX equipment connecting to the PTSN, with simultaneous call paths for voice delivery.
- Business Lines – POTS lines available for connectivity to Key Systems, or stations that require small feature sets such as a warehouse or a dock.
- PRI – Trunk connectivity for older systems solely supported by PRI interfaces, while still enabling full access to the advantages of Horizon Hosted SIP trunk services.
- Phones and Devices – Certified full featured IP Phones for desktop and conference rooms with more than 100 IP calling features. Phones available for purchase or lease.
- Call Plans – Horizon Hosted Voice call plan include Unlimited Nationwide Calling to the 48 Contiguous United States. Additional call plans are available upon request.
- Additional Options – DID numbers, Toll Free features, LNP – Local Number Porting, and Directory listings are available options.

## Where Is Horizon?

- Offices headquartered in Central Ohio in Columbus and Chillicothe
- More than 4,500 miles of route fiber in 40 counties across southern and eastern Ohio, the Columbus and Indianapolis metropolitan markets, and parts of West Virginia and Pennsylvania
- Serving anchor institutions including hospital systems, universities and school districts
- NNI or Data Centers available in Columbus, Indianapolis, Wheeling, Pittsburgh and Chicago
