

DEDICATED

INTERNET ACCESS

Most businesses live and die with the Internet and can't afford to have an unreliable or underperforming connection. When businesses connect with a shared Internet service they risk congestion, slow speeds, outages, unpredictability and security issues.

With Horizon DIA, business partners receive dedicated access to the Internet with best-in-class performance, reliability and security. You'll gain peace of mind knowing you have guaranteed scalable bandwidth with the highest uptime percentage in the industry.

Why Choose Horizon for DIA?

- You'll have one of the newest, state-of-the-art fiber networks; led by a local team that has been trusted for 125 years to supply quality customer care to all partners.
- Horizon DIA is enterprise-grade, scalable, flexible and fast.
- Horizon's network is resilient. Built with ringed technology for redundancy, providing ultimate reliability.
- Our Network Operations Center (NOC) is located and staffed in Columbus, OH, providing 24/7/365 monitored support.
- Our team has decades of experience customizing and building customer solutions that are scalable to fit not only today's needs, but tomorrow's as well.
